Isoxaben 75 WG

Herbicide

Contains isoxaben, the active ingredient used in Gallery® 75 Dry Flowable.
Quali-Pro Isoxaben 75 WG is not manufactured or distributed by Dow AgroSciences LLC.

ACTIVE INGREDIENT: % BY WT.
Isoxaben (N-[3-(1-ethyl-1-methylpropyl)-5-isoxazolyl]-2,6-dimethoxybenzamide and isomers) ........................................ 75.0%
OTHER INGREDIENTS: ........................................ 25.0%
TOTAL: .................................................................. 100.0%

Contains 0.75 lb active ingredient per pound.
EPA Reg. No. 66222-218 EPA Est. No. 53883-TX-002

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Causes eye irritation. Harmful if inhaled. Avoid ingestion, breathing dust or spray mist, and contact with skin, eyes, or clothing.

For additional First Aid, precautionary, handling, and use statements, see inside of this booklet.

Manufactured for:
Makhteshim Agan of North America, Inc.
3120 Highwoods Blvd, Suite 100
Raleigh, NC 27609

Net Weight: 1 Pound
A preemergence herbicide for control of certain broadleaf weeds in:
- Established Turfgrass
- Landscape Ornamentals
- Container-Grown Ornamentals
- Field-Grown Ornamentals
- Groundcovers/Perennials
- Non-Cropland
- Ornamental Bulbs
- Non-Bearing Fruit and Nut Trees and
- Non-Bearing Vineyards
- Christmas Tree/Conifer Plantations

FIRST AID

**IF IN EYES:**
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes; then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:**
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

**IF ON SKIN OR CLOTHING:**
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

**IF INHALED:**
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance; then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also call PROSAR at 1-877-250-9291 for emergency medical treatment information.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Causes eye irritation. Harmful if inhaled. Avoid ingestion, breathing dust or spray mist, and contact with skin, eyes, or clothing.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear:

• long-sleeved shirt and long pants
• shoes plus socks

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should:

• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

Do not contaminate water when disposing of equipment washwaters. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift may result in reduced germination or emergence of non-target plants adjacent to treated area.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling. Read all DIRECTIONS FOR USE carefully before applying.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations.
Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- coveralls
- waterproof gloves
- shoes plus socks

Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Entry Restrictions for Non-WPS Uses: When this product is applied to turf and ornamental plantings in landscape settings and non-cropland areas, do not allow entry into treated areas until sprays have dried unless wearing coveralls, waterproof gloves, and shoes plus socks.

Product Information

Quali-Pro® Isoxaben 75 WG specialty herbicide is a preemergence product for control of certain broadleaf weeds in established turfgrass, landscape ornamentals, container-grown ornamentals, field-grown ornamentals, groundcovers/perennials, ornamental bulbs, non-bearing fruit and nut trees, and non-bearing vineyards.
Christmas tree/conifer plantations, and non-cropland areas. Apply Quali-Pro Isoxaben 75 WG in late summer to early fall, in early spring, or any time prior to germination of target weeds, or immediately after cultivation.

State Specific Restrictions:
- The state of Arizona has not approved this product for use on agricultural commodities. If grown for commercial production, use on the following sites/crops is prohibited: container-grown field ornamentals, field-grown ornaments, ornamental bulbs, non-bearing fruit and nut trees, non-bearing vineyards, and Christmas tree/conifer plantations.

USE PRECAUTIONS AND RESTRICTIONS
Quali-Pro Isoxaben 75 WG controls weeds germinating from seed. Quali-Pro Isoxaben 75 WG does not control established weeds, or weeds growing from stolons, rhizomes, or root pieces. Existing weeds should be controlled by cultivation or with postemergence herbicides. Weed residues, prunings, and trash should be removed or thoroughly mixed into the soil prior to application. Soil in non-turfgrass areas should be in good condition and free of clods at the time of application. Quali-Pro Isoxaben 75 WG is stable on the soil surface for up to 21 days, but must be incorporated by moisture to be effective. A single rainfall or sprinkler irrigation of 0.5 inches or more, or flood irrigation after application is necessary to activate Quali-Pro Isoxaben 75 WG. If Quali-Pro Isoxaben 75 WG is not activated by rainfall or irrigation within 21 days after application, erratic weed control may result. In non-turfgrass areas, if weeds emerge due to lack of rainfall or irrigation, shallow cultivation to a depth of 1 to 2 inches will incorporate the herbicide and destroy existing weeds.

Treatment of Turfgrass or Ornamental Species Not Listed on the Label for Quali-Pro Isoxaben 75 WG:
Although this label contains a large number of ornamental species, it is not possible to include all of the ornamental plants that may be encountered in nursery or landscape settings. Users who wish to use Quali-Pro Isoxaben 75 WG on a plant species not listed on this label may determine the suitability for such use by treating a small area or small number of plants at a specified rate. Prior to treatment of larger areas, the treated area/plants should be observed for any sign of herbicidal injury during 30 to 60 days of typical growing conditions. The user assumes the responsibility for any plant damage or other liability resulting from use of Quali-Pro Isoxaben 75 WG on species not specified on this label.
Chemigation: Do not apply Quali-Pro Isoxaben 75 WG through any type of irrigation system.

Not for sale, use, or distribution in the state of New York.

APPLICATION DIRECTIONS

Apply Quali-Pro Isoxaben 75 WG with a properly calibrated low-pressure herbicide sprayer that provides uniform spray distribution. Nozzle screens should be no finer than 50 mesh (50 mesh is finer than 16 mesh). In-line screens and strainers should be no finer than 16 mesh. Apply Quali-Pro Isoxaben 75 WG in 10 gallons or more of water carrier per acre. As the spray volume decreases, the importance of accurate calibration and uniform application increases. Take precautions to avoid spray drift when applying Quali-Pro Isoxaben 75 WG. Drift may result in reduced germination or emergence of non-target plants adjacent to the treated area. Maintain agitation from mixing through application. Avoid boom overlaps that will increase rates above those specified. Calibrate application equipment prior to use according to manufacturer’s directions. Check calibration frequently to be sure equipment is working properly and distributing spray uniformly.

MIXING DIRECTIONS

Quali-Pro Isoxaben 75 WG - Alone

Check to be sure spray equipment is clean and not contaminated with other herbicides. Using clean water, fill the tank to 1/2 of the final volume required and start agitation. Slowly add the required quantity of Quali-Pro Isoxaben 75 WG to the spray tank, continue agitation, and complete filling the tank. Maintain agitation during filling and throughout application. Agitation should be sufficient to create a rippling or rolling action on the liquid surface. Sparger pipe agitation generally provides the best agitation. In-line screens and strainers should be no finer than 16 mesh.

If spraying and agitation is stopped, Quali-Pro Isoxaben 75 WG may settle to the bottom of the spray tank. If settling occurs, material must be resuspended before continuing spray application. Clean the spray tank, lines, and screens thoroughly after use.
Application Rate Conversion Table for Quali-Pro Isoxaben 75 WG

<table>
<thead>
<tr>
<th>lb per acre</th>
<th>oz per 1000 sq ft</th>
<th>grams per 1000 sq ft</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.66</td>
<td>0.25</td>
<td>7.0</td>
</tr>
<tr>
<td>1.00</td>
<td>0.38</td>
<td>10.5</td>
</tr>
<tr>
<td>1.33</td>
<td>0.50</td>
<td>14.0</td>
</tr>
</tbody>
</table>

Repeat applications at 1 lb or more per acre of Quali-Pro Isoxaben 75 WG should not be made sooner than 60 days after a previous application of Quali-Pro Isoxaben 75 WG. Do not apply more than a total of 4 lbs of Quali-Pro Isoxaben 75 WG per acre within a 12-month period.

Quali-Pro Isoxaben 75 WG - Tank Mix

Quali-Pro Isoxaben 75 WG may be applied in tank mix combination with labeled rates of other products provided: (1) the tank mix product is labeled for the timing and method of application for the use site to be treated; (2) tank mixing with Quali-Pro Isoxaben 75 WG is not prohibited by the label of the tank mix product; and (3) the tank mix combination is compatible as determined by a "jar test" described in the Tank Mix Compatibility Testing section below.

Add Quali-Pro Isoxaben 75 WG to the spray tank as described above and fill the spray tank to 3/4 of the final volume required. Add other formulations in this order: (1) other dry flowables; (2) wettable powders; (3) aqueous suspensions; (4) flowables; (5) liquids; and (6) solutions and emulsifiable or liquid concentrates. Allow two to three minutes between the addition of each product and agitate continuously until the product(s) is completely dispersed in water. Maintain agitation during filling and through application. If a buildup of materials is observed on the walls of the spray tank, wash the tank with soapy water between fillings, rinse, and then continue the spraying operation. Follow label directions for each material added to the tank.

Tank Mix Compatibility Testing: Use a jar test prior to tank mixing to ensure compatibility of Quali-Pro Isoxaben 75 WG and other pesticides. Use a clear glass quart jar with lid and mix the tank mix ingredients in their relative proportions. Invert the jar containing the mixture several times and observe the mixture for approximately 1/2 hour. If the mixture balls up, forms flakes, sludges, gels, oily films, or layers, or other precipitates, it is not compatible, and the tank mix combination should not be used.

- Oxalis stricta

Weeds partially controlled or suppressed when applied at 1.33 lbs per acre
(0.5 oz or 14 grams per 1000 sq ft):

Common Name:
- bindweed, field
- carpetweed
- dock, curly

Scientific Name:
- Convolvulus arvensis
- Molucca verticillata
- Rumex crispus
Established Turfgrass

Use Quali-Pro Isoxaben 75 WG as a preemergence treatment for control of certain broadleaf weeds in established cool-season and warm-season turfgrass. Apply Quali-Pro Isoxaben 75 WG any time prior to germination of target weeds.

Note: Refer to the PRODUCT INFORMATION section of this label for Use Precautions and Restrictions and information on mixing and application, application rates, and weeds controlled prior to using this product.

Specific Use Precautions and Restrictions for Turfgrasses:

Apply Quali-Pro Isoxaben 75 WG to newly seeded turfgrass (including overseeded turfgrass) only after seedlings are established (three leaf stage and tillering) and well rooted. Do not overseed established turfgrass sooner than 60 days following an application of Quali-Pro Isoxaben 75 WG.

- Do not apply Quali-Pro Isoxaben 75 WG to golf course putting greens.
- Do not apply Quali-Pro Isoxaben 75 WG to dichondra.
- Do not apply Quali-Pro Isoxaben 75 WG to turfgrass grown for seed.

Tank Mixing

Quali-Pro Isoxaben 75 WG may be tank mixed with Quali-Pro Dithiopyr 40 WSB or Quali-Pro Prodiamine herbicides and applied as a preemergence treatment to broaden the spectrum of annual grass and broadleaf weed control. Quali-Pro Isoxaben 75 WG may also be applied as a separate treatment to supplement the effectiveness of granular pre-emergent grass control herbicides in cool- and warm-season turfgrass. Quali-Pro Isoxaben 75 WG may be tank mixed with post-emergence broadleaf herbicides registered for use on established turfgrass to control existing broadleaf weeds to provide residual preemergence broadleaf weed control. Applied as directed, Quali-Pro Isoxaben 75 WG in tank mix with other products registered for use on turfgrass will provide control of susceptible weed species listed on the respective labels. When using Quali-Pro Isoxaben 75 WG in tank mix combinations with other products, read and follow all applicable use directions, precau-

</table>

*Sprigged Warm-Season Turfgrass: Use Quali-Pro Isoxaben 75 WG post-sprigging as a preemergence treatment for control of certain broadleaf weeds in warm-season turfgrass. Apply anytime after sprigging in the following turfgrass species: bermudagrass, bahiagrass, St. Augustinegrass, centipedegrass, and buffalograss. Do not apply more than 1 lb per acre of Quali-Pro Isoxaben 75 WG during the establishment phase for newly sprigged warm-season turfgrass. Do not apply Quali-Pro Isoxaben 75 WG to varieties of dwarf-type bermudagrass or to any turfgrass species being sprigged on golf course tees or greens.
Ornamental Plantings and Non-Bearing Fruit and Nut Trees and Non-Bearing Vineyards

Use Quali-Pro Isoxaben 75 WG as a preemergence treatment for control of certain broadleaf weeds in landscape ornamentals, container-grown ornamentals, field-grown ornamentals, groundcovers/perennials, and non-bearing fruit and nut trees, and non-bearing vineyards.

Apply Quali-Pro Isoxaben 75 WG any time prior to germination of target weeds, or immediately after cultivation.

Note: Refer to the PRODUCT INFORMATION section of this label for Use Precautions and Restrictions and information on mixing and application, application rates, and weeds controlled prior to using this product.

Specific Use Precautions and Restrictions for Ornamental Plantings:

To avoid possible plant injury, do not apply Quali-Pro Isoxaben 75 WG to:
- Nursery, forest, or Christmas tree: seedling beds, cutting beds, or transplant beds
- Unrooted liners or cuttings that have been planted in pots for the first time
- Pots less than six inches wide
- Groundcovers until they are established and well rooted
- Bedding plants or areas where bedding plants will be planted or transplanted within one year after application

Do not apply Quali-Pro Isoxaben 75 WG to newly transplanted ornamentals, nursery stock, ground covers, ornamental bulbs, non-bearing fruit and nut trees, or non-bearing vineyards until soil or potting media has been settled by packing and irrigation or rainfall and no cracks are present, or plant injury may occur.

Applications of Quali-Pro Isoxaben 75 WG over the top of plants with newly forming buds may cause injury. Possible plant injury may be avoided by application as a directed spray to the soil surface beneath ornamental plants.

When planting into a site treated with Quali-Pro Isoxaben 75 WG in the past 8 months, use untreated soil as fill around roots when replacing plants, or injury may occur.

Note: Injury to certain ornamental plants has been observed following application.
of Quali-Pro Isoxaben 75 WG. To avoid plant injury, do not use Quali-Pro Isoxaben 75 WG for weed control in the following ornamental plant species:

**Tank Mixing**

Quali-Pro Isoxaben 75 WG may be tank mixed with Quali-Pro Glyphosate T&O or other postemergence herbicides registered for control of existing unwanted vegetation in ornamental plantings and non-bearing fruit and nut trees and non-bearing vineyards, and to provide residual preemergence broadleaf weed control. Quali-Pro Isoxaben 75 WG may also be tank mixed with Quali-Pro Dithiopyr 40 WSB and applied preemergence to provide broad-spectrum control of annual grasses and broadleaf weeds in ornamental areas and non-bearing fruit and nut trees and non-bearing vineyards. Applied as directed, tank mixes of Quali-Pro Isoxaben 75 WG will provide control of susceptible weed species listed on the respective labels. When using Quali-Pro Isoxaben 75 WG in tank mix combination with other products, read and follow all applicable use directions, precautions, and limitations on the respective product labels. Refer to instructions for Quali-Pro Isoxaben 75 WG - Tank Mix in the MIXING DIRECTIONS section.

**Note:** Do not apply sprays containing Quali-Pro Glyphosate T&O over the top of ornamental plants. Extreme care must be exercised to prevent contact of sprays containing Quali-Pro Glyphosate T&O with foliage or stems of turfgrass, trees,
Use Quali-Pro Isoxaben 75 WG in the culture of the following established plant species:

Non-bearing fruit andnut trees and non-bearing vineyards are defined as plants that will not bear fruit for at least one year after treatment.

Ornamental Bulbs
 Ornamental Bulbs grown in Landscape Settings
Apply Quali-Pro Isoxaben 75 WG for control of susceptible annual weeds in ornamental bulbs such as bulbous irises, daffodil (narcissus), gladiolus, hyacinth, lilies, and tulip. Apply Quali-Pro Isoxaben 75 WG to weed-free soil surface 2 to 4 weeks after planting but prior to the emergence of annual weeds. Quali-Pro Isoxaben 75 WG may also be applied following bulb emergence but prior to the emergence of...
annual weeds. Quali-Pro Isoxaben 75 WG can also be applied following bulb emergence but prior to flowering and after flowering in landscape settings. For fall-planted bulbs, apply Quali-Pro Isoxaben 75 WG to weed-free soil surfaces in late winter or early spring. For bulbs, make a single application within 30 days following planting and prior to bulb emergence of up to 0.66 lb per acre. Do not exceed the 0.66 lb of Quali-Pro Isoxaben 75 WG per acre rate.

Use Precautions for Ornamental Bulbs in Landscape Settings:
Quali-Pro Isoxaben 75 WG is NOT suggested for application to:
• Tulip plants that have emerged to a height greater than 3/4 inch.
• Gladiolus prior to emergence or if corms are less than one inch in diameter.
• Bulbs while they are flowering.

Ornamental Bulbs Grown for Commercial Production*
Apply Quali-Pro Isoxaben 75 WG for control of susceptible annual weeds in ornamental bulbs such as bulbous iris, daidofé (narcissus), gladiolus, hyacinth, lilies, and tulip. Apply Quali-Pro Isoxaben 75 WG to weed-free soil surface 2 to 4 weeks after planting but prior to the emergence of ornamental bulbs and prior to the emergence of annual weeds. For fall-planted bulbs, apply Quali-Pro Isoxaben 75 WG to weed-free soil surfaces in late winter or early spring. Make a single application of up to 0.66 lb per acre. Do not exceed the 0.66 lb of Quali-Pro Isoxaben 75 WG per acre rate.

*Not for use in California or Arizona.

Use Precautions for Ornamental Bulbs Grown for Commercial Production:
Do not apply Quali-Pro Isoxaben 75 WG after the emergence of ornamental bulbs.

Shadehouse Areas
Quali-Pro Isoxaben 75 WG may be applied in open shadehouse-type structures where the natural flow of air is unimpeded. Do not apply in enclosed greenhouses or in enclosed shadehouse-type structures. Do not apply within three weeks prior to enclosing greenhouses or poly-type structures.
Christmas Tree and Conifer Plantations

Quali-Pro Isoxaben 75 WG - Alone

Apply Quali-Pro Isoxaben 75 WG as a directed spray to the soil surface or as an over-the-top spray to established plantings of field-grown Christmas tree and conifer species listed in this label. Follow all instructions provided in the PRODUCT INFORMATION section of this label.

Specific Use Precautions and Restrictions for Christmas Tree and Conifer Plantations:

Do not apply Quali-Pro Isoxaben 75 WG to seedbeds or seedling transplant beds. Apply only to established plantings. Established plants are defined as those that have been transplanted into their final growing location for a sufficient period of time to allow the soil to be firmly settled around the roots from packing and rainfall or irrigation.

Tank Mix Combinations

Tank mix combinations of Quali-Pro Isoxaben 75 WG plus other labeled herbicides may be used in established Christmas tree plantings. When applied according to use directions, these tank mixes will provide control of susceptible weed species listed on the respective product labels. Refer to tank mix product labels for specific use directions, precautions, and limitations before use. Refer to instructions for Quali-Pro Isoxaben 75 WG - Tank Mix in the MIXING DIRECTIONS section.

Quali-Pro Isoxaben 75 WG/ Quali-Pro Glyphosate T&O: Apply tank mix combinations of Quali-Pro Isoxaben 75 WG plus Quali-Pro Glyphosate T&O herbicide only as directed sprays in Christmas tree plantings. When applied as directed, Quali-Pro Isoxaben 75 WG plus Quali-Pro Glyphosate T&O will provide postemergence control of susceptible weed species listed on the label for Quali-Pro Glyphosate T&O and residual preemergence control of susceptible weed species listed on the label for Quali-Pro Isoxaben 75 WG. Refer to the Quali-Pro Glyphosate T&O label for specific use directions, precautions, and limitations before use. Refer to instructions for Quali-Pro Isoxaben 75 WG - Tank Mix in the MIXING DIRECTIONS section.

Use Precautions

- Do not apply sprays containing Quali-Pro Glyphosate T&O over the top of Christmas tree plantings.
- Extreme care must be exercised to prevent contact of sprays containing Quali-Pro Glyphosate T&O.
Pro Glyphosate T&O with foliage or stems of Christmas trees or other desirable plants, or severe plant damage or death may result.

**NON-CROPLAND AREAS**

Use Quali-Pro Isoxaben 75 WG as a preemergence herbicide for control of listed broadleaf weeds in non-cropland areas including industrial sites, utility substations, parking lots, driveways, walking paths, highway guardrails, sign posts, and delineators where maintenance of bare ground is desired.

Apply Quali-Pro Isoxaben 75 WG any time prior to germination of target weeds. Areas to be treated should be free of established weeds, or existing weeds should be controlled with postemergence herbicides.

Refer to the **PRODUCT INFORMATION** section prior to using this product on non-cropland areas.

Quali-Pro Isoxaben 75 WG is compatible and can be tank mixed with other herbicides registered for use on non-cropland areas. Applied as directed, tank mixes containing Quali-Pro Isoxaben 75 WG will provide control of susceptible weed species listed on the respective labels. All directions, precautions, and limitations on the respective product labels apply to the tank mix use. Refer to instructions for Quali-Pro Isoxaben 75 WG - Tank Mix in the **MIXING DIRECTIONS** section.

**STORAGE AND DISPOSAL**  
Do not contaminate water, food or feed by storage or disposal.  
PESTICIDE STORAGE: Store in original container only. Do not store in direct sunlight. Do not store at temperatures above 120°F. In case of leak or spill, contain material and dispose of as waste.  
PESTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.  
CONTAINER HANDLING:  
Nonrefillable Container (flexible-bag—all weights): Nonrefillable container. Do not reuse or refill this container. Completely empty bag into application equipment. Then offer for recycling if available, or dispose of empty bag in a sanitary landfill, or by incineration, or by other procedures allowed by state and local authorities.  
Nonrefillable Container (rigid—fifty lbs or less): Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available, or dispose of in a sanitary landfill, or by incineration, or by other procedures allowed by state and local authorities.  

**LIMITATION OF WARRANTY AND LIABILITY**  
Read the entire directions for use, conditions of warranties and limitations of liability before using this product. If terms are not acceptable, return the unopened product container at once.  
By using this product, user or buyer accepts the following CONDITIONS, DISCLAIMER OF WARRANTIES and LIMITATIONS OF LIABILITY:  
CONDITIONS: The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Makhteshim Agan of North America, Inc. All such risks shall be assumed by the user or buyer.
